1.0 EXECUTIVE SUMMARY

J.P. Weigand & Sons, Inc. retained Allied Environmental Consultants, Inc. (AEC) to perform a Phase I Environmental Site Assessment (ESA) for the property identified located at 2110 N Maize Road, Wichita, Kansas. AEC staff conducted this ESA under the direct supervision of the environmental professional stated in Sections 10.0 and Appendix 12.7. AEC completed the assessment on May 3, 2024.

An environmental assessment is a systematic investigation performed by an environmental professional to convey an opinion about the potential for environmental contamination. The principal objective is to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), or historical recognized environmental conditions (HRECs) at the property through review of credible historical sources, available regulatory files, and a site visit. This report presents the findings of the environmental assessment completed for the subject property. AEC performed this work in general accordance with ASTM¹ Standard E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This Standard defines the environmental conditions used by AEC in preparing our opinion regarding the subject property at the time of inspection. According to the ASTM Standard, these conditions are:

A REC is “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.” ... Per E1527-21 3.2.73.2; “A de minimis condition is not a recognized environmental condition.”

A CREC is “... recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).”

A HREC is “... a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).”

The following is a summary of the consequential findings of this ESA:

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 2110 N Maize Road, Wichita, Kansas, the subject property. Any exceptions to, or deletions from, this practice are described in Section 8.2 of this report. This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

*_*_*_*_*

¹ ASTM International; formerly known as American Society for Testing and Materials

2.0 INTRODUCTION

2.1 PURPOSE

This report presents the findings of an environmental assessment of the subject property listed in the Executive Summary through a review of historical sources, available regulatory files, and performance of a site visit by an environmental professional. Allied Environmental Consultants (AEC) completed this assessment in general accordance with the requirements of ASTM International Standard E1527-21.

2.2 SPECIAL TERMS AND CONDITIONS

Appendix 12.6 provides the terms and conditions for this work accepted by J.P. Weigand & Sons, Inc. on April 22, 2024. For this report, the terms “subject property” and “site” will refer to the property shown in Figure 1, Appendix 12.1 and defined in the Executive Summary.

2.3 SCOPE OF WORK

Appendix 12.6 presents the scope of work performed for this assessment. AEC inspected adjoining properties and the surrounding area to determine if businesses or other parties engage in activities that may affect environmental conditions of the site. AEC made inquiries of federal, state, and local agencies to determine if any potential environmental problems exist related to the site or adjoining properties. In addition, AEC contacted utility representatives and property representatives to inquire about environmental conditions on or around the subject property. AEC completed the field reconnaissance on April 26, 2024. Mr. Austin Swisher provided AEC with directions to the subject site, site access, and a description of site improvements.

2.4 LIMITING CONDITIONS AND METHODOLOGY

AEC has prepared the findings and conclusions contained herein in accordance with the methodologies set forth in the protocol. The Standard describes these methodologies as representing good commercial and customary practice for conducting an ESA to identify recognized environmental conditions at the subject property. AEC has prepared the findings and conclusions to recognize the limitations inherent to the protocol, some of which are specifically set forth below. No other warranties are implied or expressed.

- AEC was unable to access the interior of the building but due to the use of the property, a shopping center, it is not considered a limiting factor.
- AEC was unable to interview the current property owner but did interview the property manager, so it is not considered a limiting factor.

The Standard also places certain limitations regarding the use of this report by other parties, as well as consideration of new or other site information unavailable to AEC by the date completed.

2.5 DEVIATIONS

AEC performed the work represented in this report in general accordance with ASTM Standard E1527-21, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. There have been no notable deletions and/or deviations from this practice.

2.6 RELIANCE & USE

This ESA report is prepared for the exclusive use and reliance of J.P. Weigand & Sons, Inc. AEC expressly prohibits the use or reliance by any other party without the written authorization from our client and except as defined under Section 2.7 Limitations.

The term of use for this report is subject to ASTM E1527-21 Sections 4.6 and 4.8. Any other party wishing to use this report must satisfy the user's responsibilities in Section 6 of ASTM E1527-21.

2.7 LIMITATIONS

This report has been prepared on behalf of, and for the exclusive use of our client solely as an environmental evaluation of the subject site. As a mutual protection to our client, the public, and ourselves, Allied Environmental Consultants reserves the right to approve the use of conclusions or excerpts from this report. Allied Environmental Consultants, Inc. and the client have agreed, however, that the client may convey this report to their legal representative, the Buyer, Lender, and the Title Insurance Company associated with the financial transactions concerning the site.

Reliance on this ESA report by the client and authorized parties is subject to the terms, conditions and limitations stated in the proposal and ESA Report. The limitation of liability defined in AEC's proposal and stated herein is the aggregate limit of AEC's liability to the client and all relying parties.

This report addresses the historical and physical characteristics of the site with regard to possible recognized environmental conditions discernable at the time AEC performed the work. The report and associated data do not guarantee that a site is or is not free from conditions, materials, or substances that could adversely affect the environment or pose a threat to public health and safety. The report is a summary of existing conditions and we have based our conclusions upon a reasonable and knowledgeable review of the available data in accordance the standard and within the budgetary constraints imposed in the contract between Allied Environmental Consultants, Inc., and our client. If additional study by the client reveals new data, Allied Environmental Consultants, Inc., requests the opportunity to review the new data so we may modify the conclusions presented herein if necessary.

Conclusions stated herein refer only to the specific site at the time of the investigation. Allied Environmental Consultants, Inc. assumes that the data obtained, and the inferences made in the course of the investigation are reasonably representative of the property. We make no warranty, expressed or implied, except that we have performed our services in accordance with generally accepted practices and applicable regulations at the time and location of the study.

*_*_*_*_*

3.0 USER PROVIDED INFORMATION

3.1 LOCATION AND LEGAL DESCRIPTION

The subject site is located in Section 8, Township 27 South, Range 1 West of the 6th Principal Meridian in Sedgwick County at 2110 N Maize Road, Wichita, Kansas. Appendix 12.1, Figure 1 shows the site location. Appendix 12.4 provides the property's legal description.

3.2 USER QUESTIONNAIRE

The ASTM Standard **requires** the *user* to establish their knowledge of RECs in connection with the property. In order to meet this requirement, AEC has prepared a questionnaire addressing the *user's* knowledge of six potential conditions related to the subject property. Mr. Austin Swisher has reviewed and answered the questionnaire, included in Appendix 12.2, and summarized in Table 3-1.

Table 3-1: Client Questionnaire Responses

Client Questionnaire Item	Client Response			Comments
	Yes	No	Do Not Know	
1. Aware of Any Environmental Liens		X		
2. Aware of Any Activity and Land Use Limitations		X		
3. Aware of Any Specialized Knowledge or Experience of the User		X		
4. Knowledge of Fair Market Value	X			
5. Commonly Known or Reasonably Ascertainable Information		X		
6. Obvious Indicators of Contamination		X		

3.3 PREVIOUS OWNERSHIP

AEC's review of the property history documentation acquired through aerial photographs, Sanborn Maps, and city directories precluded a need for the chain-of-title. However, AEC requested The Fox Group, LLC to research any environmental liens and/or activity use limitations (AULs) recorded for the subject property. Appendix 12.4 provides the related information.

*_*_*_*_*

4.0 SITE RECONNAISSANCE

4.1 SITE AND VICINITY CHARACTERISTICS

4.1.1 General Land Use

The site is located in an area of industrial/commercial activity and residential properties.

4.1.2 Land Improvements

The site and vicinity improvements include paved roads, storm sewers, drainage ways, and available utilities such as water, sanitary sewer, telephone, electricity, and natural gas (site specific utilities are discussed in detail in Section 4.10).

4.2 SITE USE

4.2.1 Current Use and Zoning

The site consists of approximately one (1) acre and one (1) building. The subject property is currently zoned as LC (Limited Commercial).

4.2.2 Past Use

Based on the site reconnaissance and records review, past uses of the site consisted of vacant land (from at least 1968 through 1997) and a commercial strip-center building (from 1997 through the present).

4.3 ADJOINING PROPERTIES

4.3.1 Current Use

The current use(s) of adjoining properties, observed during the site inspection, are shown below.

North: Immediately north of the subject site is a McDonalds restaurant.

South: Immediately south of the subject site is West 20th Street North, followed by residences.

East: Immediately east of the subject site is a residential area.

West: Immediately west of the subject site is Maize Road, followed by Acrobatic Academy.

4.3.2 Past Use

The past uses of the adjoining properties appear to be undeveloped farmland, commercial activity, and residential areas.

4.4 SITE INSPECTION

An AEC representative conducted an unescorted on-site inspection of the subject property on April 26, 2024. The AEC representative captured digital images during the site visit to document the observed conditions of the site. The following discussion references the images provided in Appendix 12.5.

AEC has based the following descriptions on our visual observations and interview with Mr. Jose Feliciano.

The subject site consists of a strip center (photograph 1) that at the time of the site inspection contained a nail salon, a boutique, a vape/e-cig store, an esports café, Papa Murphys, AAA insurance, and a Mexican restaurant. As described in Section 2.4, AEC was unable to access the individual suites, but AEC does not consider this a concern due to property use. The remainder of the subject site is primarily asphalt, concrete, and grass-covered land (photographs 2 through 4). Near the southeastern corner of the property is a small storage unit and a trash enclosure (photographs 5 and 6). At the time of the site inspection, AEC did not observe unusual soil staining or stressed vegetation or other visual indications of environmental concerns.

4.5 SAFETY DATA SHEETS

No safety data sheets were observed during the site inspection but as described in Section 2.4, AEC was unable to access the individual suites.

4.6 LOCATION OF HAZARDOUS SUBSTANCES AND USAGE

No hazardous substances were observed during the site inspection.

4.7 BULK MATERIAL STORAGE

No bulk material storage was observed during the site inspection.

4.8 TRANSFORMERS AND POTENTIAL PCB-CONTAINING VESSELS

There are electrical transformers on or near the site. Electrical transformers can be a concern due to potentially containing Polychlorinated Biphenyls (PCBs) in the transformer oil. If untested and manufactured before July 2, 1979, the EPA considers the oil to contain PCBs in the range of 50-500 parts per million (ppm). However, the EPA considers those transformers manufactured on or after July 2, 1979 to be non-PCB containing (less than 50 ppm), even if untested. AEC considers that transformers observed to be in visibly good condition at the time of the site inspection are not an environmental concern unless leakage occurs, at which time Evergy should be notified.

4.9 SITE ENVIRONMENTAL PERMITS

The site does not hold any environmental permits at this time.

4.10 SUMMARY OF SITE UTILITIES

AEC observed or identified records indicating that a number of utilities serve the site or site area, as discussed in this section. No evidence, either observed or found in the records review, indicates that these utilities pose a significant potential to affect the environmental quality of the site.

Water Supply: Potable water is available to the subject site from the City of Wichita.

Natural Gas and/or Propane: Natural gas is available to the area of the subject site.

Electrical Supply: Electrical power is available to the subject property from Evergy.

Sanitary and Storm Sewer: Sanitary and Storm Sewer service is available to the subject site by the City of Wichita.

Septic Systems: No septic systems were observed during the site inspection.

On-Site Water Wells: No water wells were observed during the site inspection.

*_*_*_*_*

5.0 RECORDS REVIEW

AEC reviewed selected federal, state, tribal and/or local regulatory databases and historical records to identify potential environmental conditions associated with the site and nearby areas. Please note that information obtained through regulatory agency databases could be outdated due to the lag time between violations, permit reporting, etc.), and entry into the system.

5.1 PHYSICAL SETTING SOURCES

The following physical setting sources related to the subject property and surrounding area were reviewed to provide characteristics of surface and subsurface features that could influence transport (migration) of *hazardous substances* or *petroleum products* onto or from the property.

5.1.1 Topographic Map

The USGS 7.5 minute "Wichita West, Kansas" quadrangle, dated 1961 [revised 1982], shows the site and vicinity occupies a flat area (see Appendix 12.1). The general ground surface elevations range from **1,350** to **1,355** feet above mean sea level.

5.1.2 Groundwater

AEC reviewed the Kansas Geological Survey Bulletin Number 176, *Geohydrology of Sedgwick County, Kansas*, to determine that the groundwater in the area of the subject site is approximately 25 to 30 feet below ground surface and flows generally to the southeast.

5.2 HISTORICAL USE INFORMATION

The following available historical information was researched to obtain information regarding past use of the subject site and site vicinity.

5.2.1 Historical Aerial Photographs

AEC searched for available aerial photographs in possession of Wichita Sedgwick County Metropolitan Planning Commission and Google Earth and reviewed those listed below to determine changes in structures and land use. Copies of representative aerial photographs are included in Appendix 12.1 but may not show all details described below due to reproduction constraints. Distances shown below are approximate.

Table 5-1: Summary of Aerial Photographs

Year	Subject Site	North	South	East	West
1968	Vacant	Vacant	Vacant	Vacant	Vacant
1977	Vacant	Vacant	Vacant	Vacant	Vacant
1986	Vacant	Vacant	Vacant	Vacant	Vacant
1995	Vacant	Vacant	Residential	Vacant	Commercial
2002	Commercial	Commercial	Residential	Vacant	Commercial
2008	Commercial	Commercial	Residential	Vacant	Commercial
2013	Commercial	Commercial	Residential	Residential	Commercial
2018	Commercial	Commercial	Residential	Residential	Commercial
2023	Commercial	Commercial	Residential	Residential	Commercial

5.2.2 Fire Insurance Maps

Fire insurance maps were published in the past for urban areas to determine insurance rates and assist fire departments in fighting fires. The historic insurance maps can provide information about previous site uses and potential environmental concerns, such as past gasoline storage tank locations. Such maps are often referred to as Sanborn Maps after the most famous publisher of this type of document. A search of the Sanborn Map collection for this area did not find any available maps.

5.2.3 Land Record Cards

County assessor or appraiser offices often maintain records documenting changes in buildings for tax purposes. The Sedgwick County Appraiser's office was contacted to determine the availability of land record cards for the subject property. The office personnel indicated that the cards contained in Appendix 12.4 are for the subject property. The cards indicate that the property is owned by Maize 21 LLC, zoned LC (Limited Commercial), and the building was constructed in 1997.

5.2.4 City Directories

AEC had Envirosite Corporation perform a background search of the site based on a review of past city directories. This review consisted of a search of available city directory data at approximate five (5) year intervals from 1942 to 2020. This review, which is included in Appendix 12.4 of this report, found no apparent environmental concerns. The table below summarizes the background search results.

Table 5-2: Summary of City Directory Listings

Year	Listing
1942, 1956, 1964, 1968, 1973, 1978, 1983, 1988, 1993, 1998	Address Not Listed
2001	Back to Oz Toy Store Edward Jones Hundred Acre Wood Party Land Quizno's Classic Subs

Year	Listing
2006, 2011	Crissa Rooney Paul Baumann Brian Jansen Thao Mittman Karen Curtz Quizno's
2015	AAA Insurance Edward Jones Let's Paint Nail Envy Packaging Store Papa Murphy's Wild at Heart
2020	AAA Insurance Edward Jones Freezing Roll Let's Paint Nail Envy Packaging Store Papa Murphy's Wild at Heart

5.3 REGULATORY SOURCES

AEC performs this regulatory search as a due diligence search of the site and surrounding area given the nature of the regulatory systems and budgetary constraints of this investigation. Appendix 12.3 lists the standard environmental record sources required by the ASTM Standard, and the supplemental record sources added by AEC with the approximate search distances relative to the site location. AEC ordered a summary of databases maintained by the United States Environmental Protection Agency's (EPA's) national or region offices through Envirosearch Corporation. The summary included data for sites or facilities regulated under the Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response Compensation Liability Act (CERCLA), and other EPA programs.

AEC also ordered a summary of the databases maintained by Kansas Department of Health and Environment (KDHE) through Envirosearch Corporation and the Kansas Geological Society. The state database review included the state hazardous waste sites listing, the registry of Underground Storage Tanks (USTs), and the registry of water wells. AEC also obtains information which is not included in the state's databases through personal interviews, and when appropriate, request letters.

The state databases included a list of seventeen (17) "Orphan" sites that were unplotable due to inadequate address information, all of which are beyond the ASTM designated search distances. In addition, the KDHE Identified Sites List (ISL) was reviewed and found no additional sites that were not already covered in the regulatory database report.

AEC reviewed all the databases obtained from the Regulatory Report shown in Appendix 12.3, page 12, and identified the following listings within the ASTM designated search distances.

5.3.1 Federal Records

The Resource Conservation and Recovery Act (RCRA): RCRA regulates all facilities that either transport, store, dispose of (TSD), or generate hazardous waste. All RCRA information is tracked by the EPA using the Resource Conservation and Recovery Index System (RCRIS). **The RCRA databases were reviewed and found no CORRACTS facilities within 1.0 mile, no TSD facilities within 0.5 mile, and seven (7) facilities that generate hazardous waste within 0.25 mile.** A summary of the RCRA facilities is included in the following table.

Table 5-3: Summary of RCRA Facilities

Facility Name	Location/Distance (mi)	Code
In The Bag Cleaners	10231 21 st / 0 to 1/8 mile NE	NonGen with no reported violations
Superior Ambulance	2231 Maize / 0 to 1/8 mile NNW	NonGen with no reported violations
Walmart	10600 21 st / 1/8 to 1/4 mile WNW	SQG with 1 reported violation that has achieved compliance
Dillons	10222 21 st / 0 to 1/8 mile NE	VSQG with no reported violations
Walgreens	2229 Maize / 0 to 1/8 mile NNW	VSQG with no reported violations
All Angles Automotive	10707 21 st / 1/8 to 1/4 mile WNW	VSQG with no reported violations
Kirk Excavating	1903 Maize / 1/8 to 1/4 mile S	VSQG with no reported violations

Code:

VSQG – Very Small Quantity Generator - Facilities that generate less than 100 kg/month of non-acutely hazardous waste.

SQG - Small Quantity Generator - Facilities that generate less than 1000 kg/month of non-acutely hazardous waste.

NonGenerator (NonGen) – Facilities that do not presently generate hazardous waste.

5.3.2 State Records

Underground Storage Tanks (USTs): The Kansas Registry of USTs was reviewed to determine if there are USTs registered on the subject property, or adjacent properties. The UST database is reviewed to determine the potential for tank leakage or spills which may impact the environmental quality of the site. **Review of the UST database found four (4) listings within 0.25 mile of the subject property** as summarized in the following table.

Table 5-4: Summary of UST Listings

Facility Name	Address/Distance (mi)	Tank Contents	Active/Inactive
Dillons #49	2212 Maize / 1/8 to 1/4 mile N	2 Gas	2/0
King, William	10400 21 st / 0 to 1/8 mile NNW	3 Gas	0/3
Sav-a-trip	10502 21 st / 0 to 1/8 mile NNW	2 Gas 1 Diesel	0/2 0/1
Mirastar	10598 21 st / 1/8 to 1/4 mile WNW	2 Gas	0/2

Leaking Underground Storage Tanks (LUSTs): KDHE maintains a database listing known facilities with LUSTs. This database was reviewed to determine if there are LUSTs registered within 0.50 mile of the subject property and to determine the potential impact these facilities may have on the environmental quality of the site. **Review of the LUST database found two (2) listings within 0.50 mile of the subject property** as summarized in the following table.

Table 5-5: Summary of LUST Listings

Facility Name	Address/Distance (mi)	Date of Discovery	Status	KDHE Comments
Sav-a-trip	10502 21 st / 0 to 1/8 mile NNW	1/27/2000	Closed	(1)
Mirastar	10598 21 st / 1/8 to 1/4 mile WNW	6/12/2009	Closed	(1)

(1) According to KDHE, if a site has been assigned a "closed" status, the known levels of contamination at the site do not exceed the cleanup levels established by the state at that time.

Aboveground Storage Tanks (ASTs): The Kansas Registry of ASTs was reviewed to determine if there are ASTs registered on the subject property, or adjacent properties. The AST database is reviewed to determine the potential for tank leakage or spills which may impact the environmental quality of the site. **Review of the AST database found two (2) listings within 0.25 mile of the subject property** as summarized in the following table.

Table 5-6: Summary of AST Listings

Facility Name	Address/Distance (mi)	Tank Contents	Active/Inactive
Walmart	10600 21 st / 1/8 to 1/4 mile WNW	1 Unknown	0/1
Kirk Excavating	1903 Maize / 1/8 to 1/4 mile S	3 Unknown	0/3

Dry Cleaners: This database is a listing of all dry cleaning facilities registered with KDHE. **Review of the Dry Cleaners database found one (1) listing within 0.25 mile of the subject property**, as summarized in the following table.

Table 5-7: Summary of Dry Cleaners Listings

Dry Cleaners Site Name	Address/Distance (mi)	Status
Best Cleaners 2036	10231 21 st / 0 to 1/8 mile NE	Closed

Water Pollution Control (WPC) and National Pollutant Discharge Elimination System (NPDES) Permits: The Clean Water Act regulates the discharge of pollution into receiving waters. The KDHE also issues NPDES permits for wastewater discharge to streams and rivers. The KDHE oversees this federal program by issuing and monitoring WPC and NPDES permits. **According to the Kansas Environmental Interest Finder website there are no WPC & NPDES permits issued in the area of the site.**

Water Wells: The Kansas Registry of Water Wells was reviewed to determine if there are any water wells located within 0.50 mile of the subject property. **Review of the water well database found three hundred eighty-one (381) wells**, which included one (1) injection well, three hundred and thirty-five (335) lawn & garden wells, nine (9) domestic wells, two (2) irrigation wells, twenty-four (24) dewatering wells, two (2) oil field water supply wells, **and eight (8) monitoring wells**. The monitoring wells listed in the following table provide information regarding the local landowners that have placed monitoring wells on their property. Monitoring wells are a concern because they could be monitoring a groundwater problem.

Table 5-8: Summary of Monitoring Wells

Owner	Location	Number of Wells
Sav-a-trip	0 to 1/2 mile N	8

The above wells appear to be monitoring groundwater conditions at one or more sites under regulatory authority.

Oil and Gas Wells: The Kansas Geological Survey Oil and Gas Wells database was reviewed to determine if there have been any oil wells, gas wells, injection wells, or enhanced recovery wells within 0.50 mile of the subject property. **Review of the database found six (6) listings within 0.50 mile of the subject property** as summarized in the following table. Oil, gas and enhancement wells are a concern because an improperly plugged well could impact the environmental quality of the area soils and/or groundwater.

Table 5-9: Summary of Oil & Gas Wells

Owner	Location	Type of Well	Date Plugged
Allison Operating Co	0 to ½ mile N	Oil-P&A	6/24/1985
JA Allison	0 to ½ mile S	Oil-P&A	1/15/1985
Allison Operating Co	0 to ½ mile S	Oil-P&A	1/15/1985
Allison Operating Co	0 to ½ mile S	Oil	--
JA Allison	0 to ½ mile S	SWD	--
Amerkan Resources Group	0 to ½ mile S	Oil-P&A	6/14/1984

AEC did not identify problems associated with the wells from the database review and interviews associated with this project.

5.4 VAPOR ENCROACHMENT SCREENING

AEC conducted a Tier 1 Vapor Encroachment Screening (VES) as part of this assessment. AEC conducted the VES in accordance with ASTM E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* dated October 1, 2015. The VES objective is to evaluate:

- If a Vapor Encroachment Condition (VEC) exists, or
- If a VEC does not exist.

There are no regulated sites shown to be near the subject property that would indicate there is any vapor encroachment likely and, **in AEC's opinion, indicates that there are no VEC's present for the subject property.**

*_*_*_*_*

6.0 INTERVIEWS

This section summarizes interviews AEC made in person and by telephone with the various parties having knowledge of the site, or experiences of concern. Appendix 12.2 provides copies of the interview(s).

6.1 INTERVIEW WITH OWNER

As described in Section 2.4 AEC was unable to interview the current owner but was able to interview the property manager.

6.2 INTERVIEW WITH SITE MANAGER

Mr. Jose Feliciano (Property Manager, Weigand Omega):
Mr. Feliciano answered AEC's questions regarding the subject site.

6.3 INTERVIEWS WITH OCCUPANTS

No occupants were interviewed during this Phase I.

6.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

AEC identified sufficient information available through state agency-managed websites making interviews of government officials unnecessary.

6.5 INTERVIEWS WITH OTHERS

Mr. Austin Charles Swisher (CCIM, Commercial Division, JP Weigand):
Mr. Swisher signed AEC's proposal and completed the user questionnaire.

*_*_*_*_*

7.0 NON-SCOPE SERVICES

Non-Scope Considerations (ASTM E1527-21): There may be environmental issues or conditions at this site that are outside the scope of this practice (non-scope considerations), and which may require additional investigation. Some substances may be present on a property in quantities and under conditions that may lead to contamination of the property, or of nearby properties, but are not included in CERCLA's definition of hazardous substances, or do not otherwise present potential CERCLA liability. Some of the more common non-scope considerations are asbestos, radon, lead-based paint, lead in drinking water, wetlands, etc.

The client did not request AEC perform additional services with this ESA.

*_*_*_*_*

8.0 FINDINGS AND OPINIONS

8.1 FINDINGS WITH OPINIONS

The findings of the ESA for the 2110 N Maize Road, Wichita Kansas property and vicinity are summarized below along with AEC's opinion and rationale for those opinions relevant to recognized environmental conditions (RECs) as derived from these findings.

Existing Site Conditions: The subject site consists of a strip center that at the time of the site inspection contains a nail salon, a boutique, a vape/e-cig store, an esports café, Papa Murphys, AAA insurance and a Mexican restaurant. As described in Section 2.4, AEC was unable to access the individual suites, but AEC does not consider this a concern due to property use. The remainder of the subject site is primarily asphalt-, concrete-, and grass-covered land. Near the southeastern corner of the property is a small storage unit and a trash enclosure. At the time of the site inspection, AEC did not observe unusual soil staining or stressed vegetation or other visual indications of environmental concerns. Based on this information, **it is AEC's opinion that the existing site conditions do not represent a REC to the subject site.**

Property History Review: Based on the site reconnaissance and records review, past uses of the site consisted of vacant land (from at least 1968 through 1997) and a commercial strip-center building (from 1997 through present) and **in AEC's opinion does not represent a REC to the subject site.**

Area Inspection: Visual observations made during the site inspection found no indications of environmental concerns on the adjacent properties. As such, **it is AEC's opinion that RECs are not associated with property adjacent to the subject site.**

Regulatory Review: AEC's review of various documents and data indicates that a number of regulated facilities exist within the respective search distances, as shown below, and used during this Phase I ESA.

- There are seven (7) RCRA facilities shown to be located within 0.25 mile of the subject site that either have no violations of record or have achieved compliance on any violations and **in AEC's opinion are not RECs to the subject site.**
- There are four (4) UST and two (2) LUST sites located within the designated search distances from the site. Two (2) of the UST sites have had no reported leakage while the other two (2) UST sites are included on the LUST database. Both LUST sites are shown to be "closed" by KDHE. Based on this information, **it is AEC's opinion that these UST and LUST sites do not represent a REC to the subject site.**
- There are two (2) AST sites located within 0.25 mile of the subject site, neither of which have any reported leakage and **in AEC's opinion do not represent a REC to the subject site.**
- There is one (1) Dry Cleaners site shown to be located within 0.25 mile of the subject site, that is shown to be "closed" by KDHE and is located side to down gradient by the reported groundwater flow direction from the subject site. Based on this information, **it is AEC's opinion that this Dry Cleaners site does not represent a REC to the subject site.**

- AEC found six (6) monitoring wells listed in the water well database located within 0.5 miles from the subject site. **It is AEC's opinion that none of these monitoring wells represent RECs since they are all monitoring groundwater conditions at known regulated sites.**
- The Kansas Geological Survey Oil and Gas Wells database was reviewed and found six (6) wells listed within 0.50 miles of the subject site. **It is AEC's opinion that these wells don't constitute a REC to the subject site since they are not located on the subject site and have had no reported issues.**

8.2 SIGNIFICANT DATA GAPS

AEC did not encounter significant data gaps during this project.

*_*_*_*

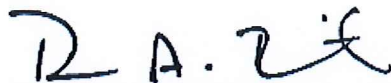

9.0 CONCLUSIONS

AEC prepared this report in general accordance with ASTM Standard E1527-21, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This standard, which provides the definition of a REC, is used by AEC in preparing our opinion regarding a subject property's environmental condition at the time of inspection.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 2110 N Maize Road, Wichita, Kansas, the subject property. Any exceptions to, or deletions from, this practice are described in Section 8.2 of this report. This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

10.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

DON A. BREIT, P.G.
PROFESSIONAL GEOLOGIST

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards set forth in 40 CFR Part 312.

APPENDIX 12.2

CLIENT QUESTIONNAIRE AND INTERVIEW

ESA Guidelines / ESA User Questionnaire

AEC's clients rely on the ESA during real estate property transfers to demonstrate due diligent inquiry to qualify for the *innocent landowner* defense to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. As such, the ESA must be thorough and completed in a professional manner.

AEC performs ESA projects in general accordance with ASTM International standard E 1527-21, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This standard provides the definition of a recognized environmental condition (REC), historical recognized environmental condition (HREC), and controlled recognized environmental condition (CREC). AEC will render professional opinions regarding the presence of these conditions with respect to the subject property at the time of inspection. ASTM defines these conditions as:

A REC is "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition"

A CREC is "... a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

A HREC is "... A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."

The ASTM Standard requires the **user** to establish their knowledge of *recognized environmental conditions* in connection with the property. In order to meet this requirement, AEC requests that, you, our client, as the **user**, read and answer the following questions. When completed, please sign, date, and return this questionnaire to AEC. We will include the signed questionnaire in our report to assist you with completing your obligations under the ASTM standard, which support "*all appropriate inquiry*" determinations under 40 CFR 312. You may wish to consult legal counsel regarding your legal responsibilities in complying with this regulation or in satisfying the innocent landowner defense under CERCLA.

PROJECT REFERENCE: 2110 N Maize Road, Wichita, Kansas, as "*the subject property*."

1) Environmental Liens:

Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?

Circle one: **YES** **NO** **Do not know**

2) Activity and Land Use Limitations (AULs):

Did a search of land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

Circle one: **YES** **NO** **Do not know**

3) Specialized Knowledge or Experience of the User:

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Circle one: **YES** **NO**

4) Fair Market Value (if not refinancing):

(a) Does the purchase price for this property reasonably reflect the fair market value of the subject property?

Circle one for (a) **YES** **NO** **Do not know**

(b) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present on the subject property?

Circle one for (b): **YES** **NO** **Not applicable**

5) Commonly Known or Reasonably Ascertainable Information:

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

Circle one: **YES** **NO**

For example, as **the report's user:**

(a.) Do you know the past uses of the subject property?

Circle one for (a): **YES** **NO**

(b.) Do you know of specific chemicals that are present or once were present at the subject property?

Circle one for (b): **YES** **NO**

(c.) Do you know of spills or other chemical releases that have taken place at the subject property?

Circle one for (c): **YES** **NO**

(d.) Do you know of any environmental cleanups that have taken place at the subject property?

Circle one for (d): **YES** **NO**

6) Obvious Indicators:

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Circle one: **YES** **NO**

If YES, explain: _____

Authorized Signature: AUSTIN SWISHER Date: 4/22/2024
 Printed/Typed Name: Austin Charles Swisher

(Interested third parties relying on the ESA through incorporation or letter of reliance must complete and sign separately to fully comply with or receive benefits under 40 CFR 312.)

ENVIRONMENTAL SITE ASSESSMENT INTERVIEW CHECKLIST FORM

SITE: 2110 N Maize Road, Wichita KS DATE: May 3, 2024

PERSON INTERVIEWED: Mr. Jose Feliciano INTERVIEWER: Sheena Bruner

TITLE: Property Manager PHONE: 316-665-2780

-
1. What are the current uses of the property?
Commercial
 2. What are the past uses of the property?
Vacant prior to commercial
 3. What are the current uses of the adjoining properties?
 4. What are the past uses of the adjoining properties?
 5. What is a general description of the buildings on the subject property?
Commercial strip center
 6. Are there hazardous substances or petroleum products on the subject site (drums, totes, or sacks of dry chemicals)? If so, what is the approximate number of containers and contents of the containers?
Not that i know of
 7. Are there any storage tanks (aboveground or underground), vent pipes, fill pipes, or access ways on the subject property?
No
 8. Are there any strong, pungent, or noxious odors on the subject property? If so, what is their source?
No
 9. Is there an electrical transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?
No
 10. Are there any drains or sumps on the subject property?
No
 11. Are there any stains or corrosion on the floors, walls, or ceilings from a substance other than water?
Don't know
 12. Are there any pits, ponds, or lagoons on the subject property?
No
 13. Is there currently, or to the best of your knowledge has there been previously, any stained soil on the property?
No
 14. Has fill dirt been brought onto the property which originated from a contaminated site, or which is of an unknown origin?
Don't know

15. Are there documented regulatory permits, applications, notifications, and inspections for the property?
No
-
16. Are there citations for environmental violations or accidents for the property?
No
-
17. Have there been contacts with regulatory officials for any reason?
No
-
18. Do you have access to any reports/plans that have been conducted on the subject property (such as environmental site assessments, environmental compliance audits, environmental permits, registrations for storage tanks, Safety Data Sheets, Community right-to-know plans, safety plans, etc)?
Don't know
-
19. Does the property discharge wastewater on or adjacent to the property, other than the storm sewer or into a sanitary sewer system?
No
-
20. Has there been any previous oil field activity on or adjacent to the property?
Don't know
-
21. Is the property served by a private well or a non-public water system? If yes, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government/health agency?
No
-
22. What is the source for potable water for the subject property?
City of Wichita
-
23. Is storm sewer service available to the site area? If so, who provides the service?
City of Wichita
-
24. Is sanitary sewer service available to the site area? If so, who provides the service?
City of Wichita
-
25. Is natural gas service available to the site area? If so, who provides the service?
Yes not sure on who the provider is
-
26. Are any septic tanks located on the subject property?
No
-
27. Is electrical service available to the subject property area? If so, who provides the service?
Yes Evergy
-

Source Description

Source Description :

The Kansas Facility Profiler (KS-FP) is a geographically-based data warehouse that presents information about facilities and locations of interest to the Kansas Department of Health and Environment (KDHE). It has in excess of twenty environmental interests which contain information on closed facilities, completed cleanups, and past operations, as well as data on current operations and activities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Kansas Facility Profiler (KS-FP) is a geographically-based data warehouse that presents information about facilities and locations of interest to the Kansas Department of Health and Environment (KDHE). It has in excess of twenty environmental interests which contain information on closed facilities, completed cleanups, and past operations, as well as data on current operations and activities.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FRS (cont.)

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Kansas Facility Profiler (KS-FP) is a geographically-based data warehouse that presents information about facilities and locations of interest to the Kansas Department of Health and Environment (KDHE). It has in excess of twenty environmental interests which contain information on closed facilities, completed cleanups, and past operations, as well as data on current operations and activities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Facility Name : MIRASTAR #64046
Facility Address : 10598 WEST 21ST ST., BLDG 200, WICHITA, KS 67205
County : Sedgwick

Site Details

Facility ID : 30204
Facility Status : ALL Tank(s) Out of Use
Entity Status : Active
Permitted AST : 0.0
Expired AST : 0.0
Unpermitted AST : 0.0
Permitted UST : 0.0
Expired UST : 2.0
Unpermitted UST : 0.0
LUST Count : 1.0
Inspection Date : N/R
Owner Name : N/R
Contact Name : Richard Harmon
Contact Address : 10598 WEST 21ST ST., BLDG 200, WICHITA, 67205
Facility District : SCDO
Latitude : 37.7258
Longitude : -97.4641
Last Date in Agency List : 2024-01-29

Tank Details

Tank Number : U001
Tank Type : U
Tank Status : Permanently Out of Service
Capacity : 12000.0
Material : Fbr Ref Plastic, Other, DOUBLE WALL TANK
Petroleum Flag : Yes
Substance : Gas Unleaded Super
Filled or Removed? : Removed

Tank Number : U002
Tank Type : U
Tank Status : Permanently Out of Service
Capacity : 15000.0
Material : Fbr Ref Plastic, Other, DOUBLE WALL TANK
Petroleum Flag : Yes
Substance : Gas Unleaded Regular
Filled or Removed? : Removed

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The Kansas Facility Profiler (KS-FP) is a geographically-based data warehouse that presents information about facilities and locations of interest to the Kansas Department of Health and Environment (KDHE). It has in excess of twenty environmental interests which contain information on closed facilities, completed cleanups, and past operations, as well as data on current operations and activities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Agency: Kansas Department of Health and Environment
Agency Contact: 785-296-1684
Most Recent Contact: 04/10/2024

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 03/25/2024

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 03/25/2024

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 02/22/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 05/20/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 02/22/2024

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 03/25/2024

FEDERAL DELISTED NPL SITE LIST (cont.)

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 03/25/2024

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES

FED E C: Federal listing of remediation sites with engineering controls

Agency Version Date: 01/19/2024
Agency Update Frequency: Varies
Planned Next Contact: 07/11/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 04/16/2024

FED I C: Federal listing of remediation sites with institutional controls

Agency Version Date: 01/19/2024
Agency Update Frequency: Varies
Planned Next Contact: 07/11/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 04/16/2024

RCRA IC_EC: Sites with institutional or engineering controls related to Resource Conservation and Recovery Act

Agency Version Date: 01/03/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/25/2024

Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 03/29/2024

FEDERAL, STATE, AND TRIBAL LEAKING STORAGE TANK LISTS

LAST - KS: Sites with leaking aboveground storage tanks

Agency Version Date: 03/22/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/18/2024

Agency: Kansas Department of Health and Environment
Agency Contact: 785-296-1684
Most Recent Contact: 03/22/2024

LUST - KS: Sites with leaking Underground Storage Tanks

Agency Version Date: 03/22/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/18/2024

Agency: Kansas Department of Health and Environment
Agency Contact: 785-296-1684

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED is made as of the 18 day of December, 2014, by **Midwest Ventures LLC**, a Kansas limited liability company ("Grantor") in favor of **Maize 21, LLC**, a Kansas limited liability company ("Grantee").

WITNESSETH, that Grantor, in consideration of the sum of Ten and No/100 Dollars (\$10.00) and other good and valuable consideration, does by these presents CONVEY and WARRANT unto Grantee, and to Grantee's successors and assigns, an **undivided one-fifth (20%)** of Grantor's interest in and to that certain parcel of real estate located in Sedgwick County, Kansas, and legally described on Exhibit A attached hereto and incorporated by this reference herein ("Property"), to be held as a tenancy in common, subject to all easements, restrictions, rights-of-way, mineral reservations, oil and gas leases, covenants, and special assessments of record, if any, any matters which would be disclosed by an accurate survey of the Property, and all other matters of record or in place.

TO HAVE AND TO HOLD THE SAME, together with all and singular the tenements, hereditaments and appurtenances thereto belonging or in any way appertaining, forever. And Grantor does hereby agree to warrant and forever defend all and singular the Property unto Grantee and its successors and assigns, against every person whomsoever lawfully claiming or to claim the same or any part thereof, by, through, or under Grantor, but not otherwise.

Property Archives

City Directory Report

Envirosite's Standard City Directory Report is a screening tool designed to assist in historical use determination of a subject property and adjacent properties. It includes a search of Property Archives digital datasets and national book collections including the Library of Congress and/or the Allen County Public Library at five year intervals or the closest available intervals.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

<u>SOURCE:</u>	<u>YEAR:</u>
Property Archives	2020, 2015, 2011, 2006, 2001, 1998, 1993
Wichita Suburban Directory	1988, 1983, 1978, 1973, 1968, 1964
Wichita City Directory	1956, 1942

Property Archives is a proprietary and comprehensive dataset of over 1.5 billion commercial, industrial and residential records, business names and uses and occupant records for every city and town in the United States, from recent years to the early 1990s. Property Archives dataset is wholly owned and operated by Property Archives, LLC

This report was prepared by Property Archives, LLC for Envirosite Corporation

CONTRACTURAL CONDITIONS BETWEEN USER & ENVIRONMENTAL FIRM

April 22, 2024

J.P. Weigand & Sons, Inc.
Commercial Division
150 N Market Street
Wichita, Kansas 67202

Attention: Mr. Austin Swisher, CCIM

via email: aswisher@weigand.com

Reference: Environmental Site Assessment - Phase I
2110 N Maize Road, Wichita, Kansas
AEC File No. P2404038

Dear Mr. Swisher:

Allied Environmental Consultants, Inc. (AEC) is pleased to submit this proposal to perform an Environmental Site Assessment (ESA) for J.P. Weigand & Sons, Inc. This proposal presents our understanding of your needs, the scope of services to address those needs, and the associated fee.

STATEMENT OF UNDERSTANDING

As AEC understands, J.P. Weigand & Sons, Inc., is interested in the subject property having the following description:

2110 N Maize Road, Wichita, Kansas (2 parcels per Sedgwick County GIS)

Furthermore, we understand that the property is developed and encompasses two (2) structures.

SCOPE OF SERVICES

AEC will complete the ESA using guidelines developed according to the ASTM International standard E1527-21 meeting all appropriate inquiry (AAI) requirements. As part of these guidelines, an AEC environmental professional or their designee will visit the site and prepare the report. An AEC Director will monitor the project for quality and standard compliance. The following tasks are part of this project.

Task 1 – Review of Environmental Database

AEC will perform a search of the environmental computer databases maintained by a national database research company for the subject property and immediate vicinity. The database research company routinely accesses state and federal agency files covering the entire nation. AEC will review the database report for environmental concerns at or near the subject property.

Task 2 – Review of Physiographic, Geologic, and Hydrogeologic Data

AEC will review publicly available documents regarding the geography and geology for the subject property's vicinity. Such documents may include water well and oil well databases, geological reports, and topographical maps, among others that describe past environmental practices, surface water concerns or groundwater depth and flow direction. These factors play a role in determining the overall concern of any environmental concerns recognized during this project.

Task 3 – Environmental Lien & Property Use Limitations

ASTM E1527-21 requires the environmental professional to review official property and/or judicial records regarding environmental liens and activity use limitations for the subject property. AEC will retain a third party that specializes in performing this research to provide the necessary data.

J.P. Weigand & Sons, Inc.

April 22, 2024

Page 2

Task 4 – Historical Review

AEC will review the historical aerial photography available through sources such as the local City/County Mapping/Planning Department, and the USDA Soil Conservation Service for past and current land use. We will also review city directories and fire insurance maps, where available, to help determine past uses of the site and surrounding area.

Task 5 – Site Inspection

We assume that a person knowledgeable of the property will be available for interview and escort during an on-site inspection. An environmental professional or their designee will visit the site and conduct a visual inspection for indications of past usage, surface spills, stressed vegetation, disposal, etc. We will take photographs (i.e., digital images) of the subject property and adjacent properties at the time of the visit. We will also compile notes regarding the on-site structures and features for use in our report. Specifically, we will visually review the property and adjoining properties for recognized environmental concerns (RECs). This inspection will not include evaluations for asbestos or lead-based paint, or confirmation of the presence of mold, unless specifically stated under Task 7.

Task 6 - Report Preparation / Project Deliverables

AEC will prepare and deliver the Phase I ESA report as a portable document file (pdf) by email. The environmental professional and an AEC director managing the project will sign the report. AEC will provide paper copies of the report paper copies for an additional cost of \$100.00 per copy.

Task 7 – Special Provisions

The client has not requested special provisions, or non-scope services, for this project. If the client requests additional services after issuing the notice to proceed with the Phase I project, we will provide a separate cost estimate and complete the services as an addendum to the project, if approved.

Reliance

Property transactions often include a number of interested parties who wish to rely on the final report or be included as a party written in the report text. AEC charges \$100.00 to prepare a reliance letter for a third party on projects that are non-Small Business Administration (SBA) projects. AEC charges \$150.00 for SBA-required reliance letters. AEC charges an additional fee of \$200.00 to modify the text of the Phase I report previously submitted to a client to add an interested third party. AEC does not charge to include a third party in a Phase I ESA report *prior to* report delivery. All other requested forms of reliance are subject to negotiation and agreement prior to proceeding with the Phase I ESA project.

CLIENT RESPONSIBILITIES

AEC requires the following information before we can initiate the title search and database research for the project:

- The physical address (if available) and/or the legal description for each property associated with the project.
- A person's name and contact information that will provide AEC access to the subject property.
- Environmental liens or Use Limitations documents recorded for the property.

If available, we also would like the following records for each property associated with this project:

- Water well permits, records, or analytical data;
- Records regarding all underground and aboveground storage tanks;
- Environmental permits (surface impoundments, RCRA, CAA, CWA, etc.); and,
- Safety Data Sheets for chemicals used at the property (if applicable).

A legal representative of J.P. Weigand & Sons, Inc., must complete, sign, and return the questionnaire included as Attachment 1 to this proposal to comply with ASTM standards and provide a legally defensible ESA document for the client. The signed form will be included in our report to you.

J.P. Weigand & Sons, Inc.

April 22, 2024

Page 3

COST ESTIMATE AND SCHEDULE

AEC will complete the Phase I Environmental Site Assessment for a **lump sum fee of \$2,350.00**, including travel and expenses. AEC will deliver the ESA report within 10 business days following receipt of notice to proceed, and provided Client gives prompt access to the property for the site visit and return the user questionnaire (Attachment 1) with the notice to proceed. A delay in AEC's receipt of site access or the user questionnaire will delay delivery of the Phase I ESA report. This proposal, including the proposed fee is valid for a period of 30 days and is subject to change thereafter. AEC will invoice additional services, such as teleconferences or meetings with third parties to discuss our findings, on a time and materials basis at the applicable billing rates attached hereto.

Please review the attached Exhibit A - General Provisions for Professional Services and following Billing Rates Sheet which are attached to this proposal and will become part of the agreement between AEC and J.P. Weigand & Sons, Inc. (as "Client") if this proposal is accepted. By accepting this proposal, the Client represents that you and/or your designees having the right-to-enter the properties stated herein for the purposes of conducting visual or intrusive inspections into the environmental conditions of said properties with such right-to-enter acquired from persons having ownership and/or control over said properties.

We hope this proposal is helpful in your evaluation of our services. If you agree with this proposal, please sign below and return to our office. Should you have any questions or comments, feel free to contact us at your convenience.

Sincerely,

ALLIED ENVIRONMENTAL CONSULTANTS, INC.

Sheena M Bruner
Environmental Geologist

ESA Guidelines / ESA User Questionnaire

ESA Guidelines / ESA User Questionnaire

AEC's clients rely on the ESA during real estate property transfers to demonstrate due diligent inquiry to qualify for the *innocent landowner* defense to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. As such, the ESA must be thorough and completed in a professional manner.

AEC performs ESA projects in general accordance with ASTM International standard E 1527-21, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This standard provides the definition of a recognized environmental condition (REC), historical recognized environmental condition (HREC), and controlled recognized environmental condition (CREC). AEC will render professional opinions regarding the presence of these conditions with respect to the subject property at the time of inspection. ASTM defines these conditions as:

A REC is "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition"

A CREC is "... a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

A HREC is "... A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."

The ASTM Standard requires the **user** to establish their knowledge of *recognized environmental conditions* in connection with the property. In order to meet this requirement, AEC requests that, you, our client, as the **user**, read and answer the following questions. When completed, please sign, date, and return this questionnaire to AEC. We will include the signed questionnaire in our report to assist you with completing your obligations under the ASTM standard, which support "*all appropriate inquiry*" determinations under 40 CFR 312. You may wish to consult legal counsel regarding your legal responsibilities in complying with this regulation or in satisfying the innocent landowner defense under CERCLA.

PROJECT REFERENCE: 2110 N Maize Road, Wichita, Kansas, as "*the subject property.*"

1) Environmental Liens:

Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?

Circle one: **YES** **NO** **Do not know**

2) Activity and Land Use Limitations (AULs):

Did a search of land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

Circle one: **YES** **NO** **Do not know**

3) Specialized Knowledge or Experience of the User:

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Circle one: **YES** **NO**

4) Fair Market Value (if not refinancing):

(a) Does the purchase price for this property reasonably reflect the fair market value of the subject property?

Circle one for (a) **YES** **NO** **Do not know**

(b) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present on the subject property?

Circle one for (b): **YES** **NO** **Not applicable**

5) Commonly Known or Reasonably Ascertainable Information:

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

Circle one: **YES** **NO**

For example, as **the report's user**:

(a.) Do you know the past uses of the subject property?

Circle one for (a): **YES** **NO**

(b.) Do you know of specific chemicals that are present or once were present at the subject property?

Circle one for (b): **YES** **NO**

(c.) Do you know of spills or other chemical releases that have taken place at the subject property?

Circle one for (c): **YES** **NO**

(d.) Do you know of any environmental cleanups that have taken place at the subject property?

Circle one for (d): **YES** **NO**

6) Obvious Indicators:

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Circle one: **YES** **NO**

If YES, explain: _____

Authorized Signature: AUSTIN SWISHER Date: 4/22/2024
 Printed/Typed Name: Austin Charles Swisher

(Interested third parties relying on the ESA through incorporation or letter of reliance must complete and sign separately to fully comply with or receive benefits under 40 CFR 312.)

EXHIBIT A

**GENERAL PROVISIONS
FOR PROFESSIONAL SERVICES**

General Provisions for Professional Services**EXHIBIT A**
Page 1 of 3GENERAL PROVISIONS FOR PROFESSIONAL SERVICES

In consideration hereinafter set forth, Allied Environmental Consultants, Inc., its officers, directors, employees, agents, shareholders, and partners, (collectively "Allied") and Client, its officers, directors, employees, agents, shareholders, and partners (collectively "Client") agree as follows:

1. Statement of Work. Consultant will furnish the services of its environmental professionals and technicians necessary to perform the work described in the attached Proposal hereto and incorporated herein by reference. The attached Proposal will specify the time of performance, amount and method of payment and any other special conditions applicable to this project.
2. Performance: Allied agrees to perform the professional, environmental and technical services described in the attached Proposal in good faith under the terms and conditions set forth in this Agreement. Allied's responsibility is limited to work specifically performed by Allied for Client. Allied is not responsible for acts or omissions of Client, its officers, directors, employees or agents, or any third party not under the direct control of Allied. Allied's services will be performed, findings obtained, and recommendations prepared in accordance with professional standards and practices generally and currently accepted at the time and at the locality where services are rendered. Allied does not warrant that its services create or guarantee a specific result. The representations in this paragraph are in lieu of all warranties either expressed or implied.
3. Insurance: Allied and Client agree to each maintain statutory Worker's Compensation, Employer's Liability Insurance, General Liability Insurance, and Automobile Insurance coverage for the duration of this Agreement. Additionally, Allied will maintain Professional Liability Insurance for Allied's negligent acts, errors, or omissions in providing services pursuant to this Agreement. If a project is Design-Build, the Client and all subcontractors providing professional design or other services (e.g., architects, engineers, inspectors, etc.) shall maintain professional or similar liability insurance for claims arising from its negligent performance of said services. Proof of insurance shall be provided, upon request, prior to commencement of said services.
4. Differing Site Conditions: The conditions at the site are the property of the Client/Owner regardless of whether or not they could be identified by an investigation or exploration conducted according to the professional standard or care. A "Differing Site Condition" is a subsurface, hidden, latent, or physical condition at a project site/building not revealed by the site exploration, site investigation, or other information provided to the Client and which cannot reasonably be anticipated. Allied is not responsible for any subsurface or concealed conditions, utilities, structures or other obstructions (collectively hereinafter "Conditions") not identified by Client provided: (i) Allied is not required to investigate such conditions except as identified in the attached Proposal, and (ii) Allied performs the work in accordance with principles and practices generally and currently accepted at the time and in the locality where the services are rendered. If during the course of the work, Allied discovers differing site conditions, hazardous substances, pollutants, contaminants, or utilities on the site which were not disclosed prior to Allied's submission of the attached Proposal Letter; and this discovery materially increases the cost and/or schedule for Allied's services; then Allied shall be entitled to an equitable adjustment for additional fees, expenses, and time for performance. Accordingly, Client agrees to indemnify, including all costs and attorney's fees, and hold Allied harmless from all claims for Differing Site Conditions, provided Allied performs the services specified in the Contract in a manner reasonably conforming to the terms of the Contract and to the Standard of Care.
5. Force Majeure: The Client shall not hold Allied responsible for damages or delays in performance caused by force majeure, acts of God, or other acts or circumstances beyond the control of Allied, or that could not have been easily foreseen and prevented including, but not limited to fire, weather, floods, earthquakes, epidemics, war, riots, terrorism, strikes, and unanticipated site conditions.
6. Extra Work: Services not specified in the Scope of Services set forth in this Agreement or due to regulatory changes shall be considered "extra work." No "extra work" will be performed without additional compensation per a supplemental agreement.

General Provisions for Professional Services**EXHIBIT A
Page 2 of 3**

7. Indemnity: To the fullest extent permitted by law, Allied and Client shall defend, indemnify and hold each other, their officers, employees, agents, insurers, sureties, and parent and affiliated corporations, harmless from any and all losses, consequential damages, expenses (including but not limited to attorneys', consultants' and experts' fees), claims, suits, liabilities, fines, penalties, and remedial or clean-up costs arising out of or in any way related to each party's: (i) negligent or willful misconduct with regards to the performance of the Work; (ii) any breach of this Contract; or (iii) any negligent or willful act or omission by each party, their invitees, or any person performing Work directly or indirectly on behalf of each party, regardless of whether the other party is partially at fault. This indemnity and defense obligations shall apply to any claim against either party by any employee of the other party; and each party shall not assert as a defense in any suit by the other party to enforce obligations under this Article any immunity or other defense provided under any worker's compensation or other laws. Each party's obligations under this Article shall not be limited by any other provision of this Agreement or by any law. Any damages recoverable shall bear interest at the annual rate of 18%, or the highest rate allowed by law, if lower.

With the exception of losses or injury caused by the negligence of Allied, the Client also agrees:

a. To waive any claims of liability against Allied for injury or loss allegedly arising from the activities required by the study or from the discovery of the existence or possible existence of any hazardous substances, pollution or contamination of any type on or under the facility or any adjacent property whether resulting from previous or existing operations.

b. To waive any claims against Allied resulting from the inability to cure such conditions or otherwise achieve an agreement to consummate the sale or lease of the facility if currently contemplated.

8. Limitations of Liability: Notwithstanding the obligations in Paragraph 7, to the fullest extent permitted by law, Allied's total liability to Client is limited to the greater of \$25,000 or two times Allied's fee, for any and all damages or expenses arising out of this Agreement from any cause(s) or under any theory of liability. In no event shall Allied be liable for consequential damages, including, without limitation, loss of use or loss of profits, incurred by Client or its subsidiaries or its successors, regardless of whether such damages are caused by breach of contract, willful misconduct, negligent act or omission, or other wrongful act of either of them.

9. Handling of Hazardous Materials: Client recognizes and agrees that Allied is not a "generator," "transporter," "owner," or "treater," of hazardous waste or hazardous materials nor is Allied an "owner," or "operator" of the job site (as all such terms are used and defined under state and federal laws). Allied shall have no responsibility for the transportation, storage, treatment, or disposal of contaminated or potentially contaminated waste materials or materials of any kind, whether or not directly or indirectly generated from Allied's performance of the services hereunder except as specifically set forth in the attached Proposal. Client shall be responsible for the proper treatment, storage, and/or disposal of any such materials.

Client warrants and guarantees that title, as between Client and Allied, to all hazardous materials, substances, pollutants, and contaminants originating or removed from the job site by Allied will remain in and with Client. Client further warrants and guarantees that, as between Client and Allied, it will not challenge the ownership of substances enumerated above by any means, including suits in state or federal court, arbitration or actions in any form.

10. Governing Law and Forum: Any dispute between the parties arising out of or relating to this Agreement shall be governed by Kansas Law. Good faith negotiation and mediation are express conditions precedent to the filing of any legal action. Mediation shall be conducted in accordance with the latest edition of the Construction Mediation Rules of the American Arbitration Association.

11. Termination Without Default. If at any time during the performance of services hereunder, (a) Client requires Allied to stop work or (b) Allied, in its sole discretion, is of the opinion that (i) continuation of work would create an unnecessary or unreasonable safety and/or health risk to its employees or others or (ii) sub

General Provisions for Professional Services**EXHIBIT A
Page 3 of 3**

surface conditions and/or contaminants differ significantly from conditions, events, or contaminants which were reasonably foreseeable at the time this Agreement was executed, then this Agreement shall be deemed complete and terminated. Upon such termination, neither party hereto shall have any further liability to the other with respect to this Agreement, except for any moneys currently owed to Allied at the time of termination; any expenses which cannot be avoided as a result of termination; and return of or submission of any materials to Client in Allied's possession which are to be returned to Client under the terms of this Agreement. Such termination shall not be considered a default by either party.

12. Payment: Client shall be obligated to pay all undisputed labor costs and project costs as agreed to in the scope of work, as follows: (a) project labor fees itemized in lump sum, hourly, or unit price format; (b) project costs such as (but not limited to) rental of special equipment (and necessary fuel, if any), analytical testing, subconsultants, subcontractors, vendors, special supplies, field supplies, and incidental parts and equipment necessary to complete the work etc.; (c) project reimbursable expenses such as (but not limited to) overnight employee expense (meals-motel-incidentals), vehicle mileage, rental vehicles (and necessary fuel), public agency fees, taxes, extraordinary costs of reproducing documents or publishing reports and deliverables, and postage, if any, associated with the scope of work, with itemization of these costs. All (b) project costs will be marked up 10%, and all (c) reimbursable expenses will be passed through at direct cost. The Client authorizes Allied to pay all bills associated with the scope of work, whether incurred by Allied or the Client. All project costs and reimbursable expenses related to the work shall be included in the monthly bills as additional costs.

Billing shall be upon project completion or monthly, whichever is less. Outstanding balances shall be due within 30 days from the date of invoice and subject to a late charge of 1.50% per month or the maximum allowed by law, whichever is less. Late charges shall be added for all amounts past due and re-billed after 30 days.

Collection of all undisputed amounts due Allied by the Client shall be at the Client's expense. Allied may enforce a lien against documents in Allied's possession acquired by its services, in accordance with Kansas law. Allied shall be entitled to recover reasonable expenses, including attorney's fees, incurred in collecting amounts billed pursuant to this Agreement, whether or not a lawsuit is brought.

Invoice items subject to dispute by the Client, whether fees, costs, or expense, shall be segregated by both parties for resolution, and all other fees, costs, and expense shall be promptly paid in accordance with this Agreement. Disputed items shall then be resolved by negotiation between the parties involved.

13. Entire Agreement: The terms and conditions set forth herein constitute the entire understanding of the parties relating to the services to be provided by Allied to client as described in the attached Proposal. All previous proposals, offers, and other communications relative to the provisions in the services by Allied, oral or written, are hereby superseded, except to the extent that they have been expressly incorporated herein. Any modifications or revision of any provisions hereof or any additional provisions contained in any purchase order, acknowledgment, or other form of Client are hereby expressly objected to by Allied and shall not operate to modify this Agreement. This Agreement shall take effect upon acceptance and execution by both parties.

Any individual executing this document in a representative capacity represents and warrants that the individual possesses the authority to execute the document on behalf of the named principal.

ALLIED ENVIRONMENTAL CONSULTANTS, INC.

PERSONNEL CLASSIFICATIONS AND TITLES

PERSONNEL	TITLE	BILLING RATE
Paul R. Clark	President / Director Principal Geologist	\$145.00
Don A. Breit	Vice President / Director Principal Geologist	\$145.00
Theodore B. Francis	Principal Engineer	\$145.00
Sheena M. Bruner	Environmental Geologist	\$100.00
Jennifer K. Thimesch	Project Administrator	\$85.00
Kristi D. Ward	Project Administrator	\$85.00
AEC AFFILIATES	TITLE	BILLING RATE
Ralph M. Keller	Certified Industrial Hygienist, Professional Engineer	\$145.00

Hourly personnel include general clerical and technician staff. These personnel will be invoiced at 1.2 times the billing rate when more than 40 hours of work are authorized in one week.

AEC will charge for reimbursable expenses incurred directly or indirectly on projects, inclusive of subcontractors, subconsultants and non-labor project materials, expenses, and travel at cost plus 10%. AEC charges \$0.70 / mile for vehicle expenses unless using rented vehicles, which will be charged at cost plus 10%. The "meals and incidentals" rate is \$60.00 per person per day. AEC-owned equipment used on the project will be charged at hourly, daily, or weekly rates set annually.

APPENDIX 12.7

QUALIFICATIONS AND LICENSE/CERTIFICATION OF ENVIRONMENTAL PROFESSIONAL(S)

DON A. BREIT, P.G.
Principal Geologist

As Vice President for Allied Environmental Consultants, Inc. (AEC), Don Breit is responsible for on-site soils testing and materials and foundations investigations. Mr. Breit manages a variety of site assessment projects and supervises field activities during site characterization.

Mr. Breit has over 25 years of experience in Engineering and Environmental Geology, which has included performing and/or supervising hundreds of Phase I Environmental Site Assessments throughout Kansas, Missouri, Nebraska, and Oklahoma over the past 20 years.

Mr. Breit has the following degrees, certifications and registrations:

- Fort Hays State University, Bachelor of Science, Geology, 1981
- State of Kansas Licensed Geologist (No. 159) (See Appendix M)
- Certified Professional Geologist, American Institute of Professional Geologists (No. 8571)
- Certified Hazardous Materials Manager, Institute of Hazardous Materials Management (No. 5697)
- Certified for OSHA Hazardous Site Operations and Management
- National Asbestos Training Center: Asbestos Inspector and Project Designer (AHERA)

SHEENA M. BRUNER
Environmental Geologist

EDUCATION

Associates Degree, Liberal Arts, Butler Community College, 2005
Engineering coursework, Oklahoma State University, 2005-2010
Bachelor of Arts, Geology, Wichita State University, August 2013

AEC has employed Ms. Bruner since May of 2010, initially serving as an Environmental Technician and promoted to an Environmental Geologist in August 2013 and provides AutoCAD drafting, data collection, field reporting, environmental research, and historical records review in support of Allied's project management staff.

Ms. Bruner also provides chemical data validation services and interfacing with the various analytical laboratories that provide contract services to Allied. She has guided implementation of Allied's database policies, first in Envirodata and then in Chempoint. Ms. Bruner maintains more than 50 chemical databases that support Allied's analytical validation and reporting functions to our clients.

FIELDS OF SPECIALIZATION

- Environmental Site Assessments (Phase I & II)
- Chemical database management (Chempoint, MS Access, MS Excel)
- Chemical Data Validation
